

REVELATION AND SCIENCE

Inter-Disciplinary Journal of Intellectual Revival

Revelation and Science is a refereed academic journal published by the Kulliyah of Science, International Islamic University Malaysia (IIUM). The journal aims to comprehensively integrate dimensions of knowledge conventionally regarded as separate and strengthen the efficiency of human intellectual progress. In line with the objectives of the Kulliyah and the University, the journal is dedicated to the integration of science and religion, and the promotion of universal values. While acknowledging the substantial progress that has been made in the scientific fields, the journal is committed to the idea that the search for solutions to human predicaments can be enhanced by reference to an epistemological framework that is not restricted to reason and observation alone, but acknowledges the role of Revelation (wahy). The Revelation and Science journal covers theoretical and applied sciences as well as studies related to the integration of scientific knowledge and revelation. The journal is a compilation of academic and research articles, review articles, conference reports and abstracts that address contemporary issues within its scope.
